

We set the **New Standard**
for Drive-Thru Communications

Say hello to the 3M™ Drive-Thru Headset G5 – Our fifth-generation headset

Get ready to experience a whole new level of communications. It features everything you asked for—increased durability, lighter weight, enhanced comfort, backward-compatibility and even the ability to make repairs in store.

The 3M headset is designed to make your team more productive and your business more profitable. Outfitting your team with this headset, along with the 3M digital base station, is clearly the sound decision.

New to the industry features and benefits!

- Onsite service-ability, allows you to service and repair your headset on site within seconds.
- Smart Battery technology decreases downtime with LED indicator lights keeping you informed of fuel level and end of life indicators.
- OEM Authentication prevents counterfeit Batteries, Carriers and Control Pods helping to ensure optimal sound and performance.
- Haptics “feel” Technology provides confidence in a noisy restaurant environment.
- Capacitive “feather” Touch Technology makes headset use more comfortable and easy to use.
- Accelerometer, assuring battery conservation when your headset is not in use and instant “on” when you’re ready to use.
- Identification Tags allows restaurants to identify headsets, assign to team members for more ownership and tie headsets to reminders and alert messaging.
- Integrated headset storage and battery charging stations stores headsets and batteries in one location helping to prevent lost or damaged headsets.
